

Statistics Committee
5th meeting
6 March 2013
London, United Kingdom

**Exports of organic coffee and
differentiated coffees
Calendar years 2005 to 2012**

Background

1. With the entry into force of the ICA 2007 in February 2011, the Rules for Statistics – Certificates of Origin (document ICC-102-9) came into effect, and Members were given 12 months to adapt their systems to the new requirements. The new Rules aim to facilitate the collection of data on the exports of organic¹ and differentiated coffees based on Certificates of Origin, although the provision of data on the latter is strictly voluntary. This report includes data received under the new Rules, as well as data previously provided by Members extracted from Certificates of Origin and Statistical Reports.
2. Tables 1 and 2 show the volume of exports of organic coffee by exporting Members, in calendar years 2005 to 2012 by origin and by destination based on Certificates of Origin and Statistical Reports, respectively. Graph 1 shows the evolution of exports of this segment of the market in the period covered by this report based on these sources.
3. Information on differentiated coffees is not available prior to 2008. Table 3 shows the volume of exports of differentiated coffees by origin and by destination in calendar years 2008 to 2012. Graphs 2 and 3 show, respectively, the share of these exports by origin and by destination in calendar year 2012. On the basis of the information extracted from Certificates of Origin, there has been an increase to 1.76 million bags (equivalent to 530.6%) in 2012 over the volume of 0.28 million bags reported in 2011. This indicates the significant improvement in the reporting of information on the trade of differentiated coffees – although this is done on a voluntary basis.
4. The Organization will continue to monitor the exports of this segment in the market.

Action

The Statistics Committee is requested to take note of this document.

¹ In accordance with the Rules on Statistics – Certificates of Origin contained in document ICC-102-9, exporting Members undertake full responsibility for ensuring that the certification of organic coffee complies with the specifications set out in ISO Guide 65 – General Requirements for bodies operating products certification.
