

Statistics Committee
12th Meeting
14 March 2017
London, United Kingdom

**ICO composite and group indicator prices:
Share of markets and group weightings
Calendar year averages: 2013 to 2016
Effective from 1 October 2017**

Background

1. Every two years, in accordance with the Rules on Statistics – Indicator prices contained in document [ICC-105-17](#), there should be a review of the market share in each group and their weightings for the calculation of the ICO composite and group indicator prices shown in Annex I of that document.
2. A similar review last took place in 2015 when the Statistics Committee recommended to the Council that the new group market shares and their weightings were to take effect from 1 October 2015 in accordance with the data presented in Addendum 1 of the document under reference.
3. Table 1 gives the latest information on average exports of green coffee in calendar years 2013 to 2016 to all destinations, to the European Union and to the USA by group of coffee. It also provides the share of the markets in each group of coffee and their weightings (current and new) in the calculation of the ICO composite indicator price and the group indicators in accordance with the Rules. Table 2 gives the proposed group weightings and market shares which, if agreed, would come into effect from **1 October 2017**.

Action

The Statistics Committee is invited to consider this matter and to make recommendations to the Council.
