

International Coffee Council  
134<sup>th</sup> Session  
3–7 October 2022  
Bogotá, Colombia

## Corrigendum

### Maximum Residue Limits (MRLs)

RESTRICTED

Changes in this corrigendum have been highlighted in red.

### Comparison between Codex Alimentarius and selected national standards (page 2)

Replace “0.20” with “0.01” in the European Union column for Chlorpyrifos:

Pesticide	Codex Alimentarius	Year of Adoption	European Union
Chlorpyrifos	0.05 mg/kg	2003	0.01

### Comparison between Codex Alimentarius and selected national standards (page 3)

Add footnote to Fosetyl Al:

Pesticide	Codex Alimentarius	Year of Adoption	European Union
Fosetyl Al <sup>1</sup>	30 mg/kg	2021	

- 1 The Maximum Residue Limit of Fosetyl-al is now under the definition of Phosphonic Acid with a planned reduction of 5 mg/kg to 0.3 mg/kg, which may entail difficulties for coffee imports from certain countries.
