International Coffee Council  
105<sup>th</sup> Session  
22 – 24 September 2010  
London, England

**Employment generated by the coffee sector**

## **Background**

1. In the context of its programme of activities, the Organization pays particular attention to the collection of relevant statistical data on the world coffee sector.
2. In April 2010 the Executive Director requested all Members of the Organization to send data on employment generated by the coffee sector in their countries, covering all relevant stages of the coffee value chain including cultivation, processing, marketing, logistics, trade and industrialization. Members were also requested to provide data on distribution of employment by gender, if available. The Annex consolidates the replies received from Members. It presents information on coffee producing countries and information received from importing Members. Information received from exporting Members is shown in **bold** and is supplemented by ICO estimates. No data on distribution of employment by gender were received.
3. Members who have not yet furnished data are requested to do so as soon as possible.

## **Action**

The Council is requested to take note of this document.
