International Coffee Organización Internacional del Café Organização Internacional do Café Organisation Internationale du Café

Executive Board 261st Meeting 23 – 24 May 2006 London, England Progress report on the implementation of the Coffee Quality-Improvement Programme (CQP)

Background

1. Exporting and importing Members have continued their commitment to improving quality through the Coffee Quality-Improvement Programme (CQP) which was adopted in its current form when Resolution number 420 was approved by the Council in May 2004. The CQP targets the promotion of quality as a means to enhance sustainability of the coffee economy by increasing consumption, by adding value and providing consumer satisfaction (see document ICC-90-9).

2. In accordance with the Resolution, exporting Members are requested, should they wish, to indicate in box 17 of all Certificates of Origin issued from 1 June 2004, information on the quality of the coffee exported by defects and moisture content. This allows the Organization to monitor the level of compliance with the target standards based on the data received.

3. This document presents a summary for the first six months of coffee year 2005/06 – (October 2005 to March 2006) of the London International Financial Futures and Options Exchange (LIFFE) Robusta gradings and for NYBOT Coffee "C" Gradings. It also contains information on progress on implementing the CQP under the provisions of Resolution number 420 in exporting Member countries in the same period based on data extracted from Certificates of Origin. The previous report on the CQP is contained in document WP-Board No. 989/06.

Action

The Executive Board is requested to take note of this report.

1. Since May 2004, following the adoption of Resolution number 420 by the Council, exporting Members have been requested, on a voluntary basis, to provide information on the quality of green coffee exports. The Organization has been monitoring information received from these Members on all shipments that have taken place from 1 June 2004 – when the Resolution came into effect. This report concentrates on information related to shipments in the six months of coffee year 2005/06 – which may vary from country to country in accordance with the data received.

2. Since June 2004, twenty exporting Members have so far availed themselves of the opportunity to fully implement Resolution number 420. These Members are: Angola, Bolivia, Brazil, Colombia, Costa Rica, Democratic Republic of Congo, Dominican Republic, Ecuador, El Salvador, Ethiopia, Guatemala, Honduras, India, Mexico, Nicaragua, Papua New Guinea, Philippines, Rwanda, Tanzania and Togo. Annex I gives details of the exports of all green coffee complying with the provisions of Resolution number 420. It should be noted that in the period covered by this report, data may not have been received from all the exporting Members listed.

3. Annex II gives information on the total volume of green coffee by type exported by those countries in compliance with the provisions of Resolution number 420 in the first six months of coffee year 2005/06.

4. The Organization continues to monitor the daily gradings for Robusta coffee carried out by LIFFE since April 2001 at most European ports. Annex III gives a summary of these gradings – classified by LIFFE under types 3, 4 and untenderable, in accordance with its grading system, which are deemed to fall below the ICO target standards – by port and by origin from October 2005 to March 2006. The volume of coffee graded by LIFFE which was deemed to have failed to comply with the targets of Resolution number 420 in this period amounted to 708,250 bags. Of this total, nearly 53% failed the grading analysis in Antwerp and nearly 88% was produced in Vietnam. This volume compares with 595,833 bags graded in the period October 2004 to March 2005 which represents an increase of nearly 19%.

5. Regular reports on the Coffee "C" contract grading analysis are posted on the New York Board of Trade (NYBOT) website showing the monthly summary and year to date results on the pass/fail by origin. Coffee which has been graded and failed may be submitted to an appeal grading for cup, colour, grade and other imperfections such as odour and/or bean size. The reports indicate that, from October 2005 to March 2006, over 83% of the coffee graded by NYBOT (68% on the original grading and an additional 15% on appeal) passed the grading analysis – see Annex IV for details.

6. Since Resolution number 420 came into effect in June 2004, 153.03 million bags of green coffee have been exported. The table below shows the aggregate volume of coffee by type (and their equivalent shares) exported by the 20 Members implementing the Resolution.

The table also shows the aggregate volume exported by these Members which are in full compliance with the quality standards set by the Resolution in the 22 months since it came into effect.

	60-kg bags	%
Total volume of coffee exported since June 2004 by the		
20 countries implementing Resolution 420	91 069 204	100.00
Arabica	85 392 338	93.77
Robusta	5 676 866	6.23
Total volume of coffee exported since June 2004 by the		
20 countries in full compliance with the quality		
standards set in Resolution 420	80 562 839	100.00
Arabica	75 899 411	94.21
Robusta	4 663 428	5.79

7. From October 2005 to March 2006, the volume of coffee exported by the 20 Members implementing the Resolution amounted to 27.98 million bags of which over 20.12 million bags were Arabica (72%) and nearly 7.86 million bags were Robusta (28%). The volume of coffee exported by the 20 exporting Members in full compliance with the Resolution represented just under 70% of the total volume exported in the period (40.49 million bags).

8. The volume of Robusta green coffee exported in the period covered by this report still indicates that just over 16% of the Robusta coffee exported by the 20 Members is in full compliance with Resolution 420. Nearly 84% of the Robusta coffee exported was unspecified in terms of its quality standards, of which just under 94% was exported from Vietnam. On the other hand, the volume of green Arabica coffee in full compliance with the Resolution amounted to over 97% of the total Arabica coffee exported in the period.

9. The figures concerning Robusta exports continue to cause some concern. The Organization will continue to monitor LIFFE and NYBOT gradings as well as compliance with Resolution number 420 by exporting Members based on data extracted from Certificates of Origin.

ANNEX I

Exports of all green coffee classified in accordance with Resolution number 420 October 2005 to March 2006
