**ICO composite and group indicator prices:
Share of markets and group weightings
Averages: 2001 to 2003; 2002 to 2004
and 2001 to 2004**

Background

1. Every two years, in accordance with the Rules for the collection, transmission, calculation and publication of group and composite prices contained in document EB-3776/01, there should be a review of the market share in each group and their weightings for the calculation of the ICO composite indicator and group prices shown in Annex I of that document.
2. The last review last took place in 2003 when the Committee recommended to the Council that the new group market shares and their weightings should become effective from 1 October 2003 in accordance with the exercise contained in document WP-Statistics No. 61/03 Rev. 1.
3. The tables in this document give the latest information on the total average exports of green coffee in calendar years 2001 to 2004 to all destinations and to the USA and the European Community by group of coffee. The tables also provide information on the share of the markets in each group of coffee and their weightings (current and new) in the calculation of the ICO composite indicator price, in accordance with the Rules which were calculated based on the relevant averages in three different periods: 2001 to 2003 (Annex Table I); 2002 to 2004 (Annex Table II) and 2001 to 2004 (Annex Table III).

Action

The Statistics Committee is invited to consider this matter and to submit its recommendations to the Council.
